

Leadership and Personal Success through Self-Awareness and Emotional Intelligence

Register at www.nyas.org/PersonalSuccess

Leadership and personal success through self-awareness and emotional intelligence are popular pursuits outside the scientific community, but why not in science? This two-session course examines and teaches these pursuits from the perspective of scientific fields such as cognitive behavioral science, evolutionary psychology, and positive psychology, respecting nature and avoiding unscientific perspectives. The presenter is a PhD scientist who brings a new perspective to those fields, showing how a scientific approach can improve leadership and professional and personal success.

You will leave the course with tools to continue your development on your own as well as a network of like-minded people, both as resources and for accountability. The course also makes all other leadership resources – books, videos, seminars, etc – more valuable through better understanding their foundations.

Speaker

Joshua Spodek, PhD, MBA

Presented by **Science Alliance** at the **New York Academy of Sciences**
